

My updated Landing.jsx file:

```
import { useState } from 'react';
import { useNavigate } from 'react-router-dom';
import { supabase } from '../supabaseClient'; // Make sure this is set up!
import Typelt from "typeit-react";
import Button from 'react-bootstrap/Button';
import Logo from '../components/Logo';

export default function Landing() {
  const [showButton, setShowButton] = useState(false);
  const [showLogin, setShowLogin] = useState(false);
  const [username, setUsername] = useState("");
  const [password, setPassword] = useState("");
  const [error, setError] = useState("");
  const navigate = useNavigate();

  const handleLogin = async () => {
    const { error } = await supabase.auth.signInWithPassword({
      email: username,
      password: password,
    });

    if (error) {
      setError("Login failed: " + error.message);
    } else {
      navigate('/home');
    }
  };

  return (
    <div className="bg-brand-primary">
      <div className="landing-logo">
        <Logo />
      </div>
      <div className="landing-content">
